EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Corwin P. Umbach (Reg. No. 40,211) on September 17, 2004.

The application has been amended as follows:

- Cancel claims 12, 13, and 14.

Allowable Subject Matter

2. Claims 1-3, 5-11, 17, and 19 are allowed.

Examiner's Comments

3. The product-by-process claims (12, 13, and 14) were cancelled in light of newly found Rathi et al. (Pub. No.: US 2003/0089992 A1). The process in Rathi et al. is different from the process of the instant invention; however, the final product Rathi et al. does not appear to be patentably distinct from the final product of the instant invention (see paragraphs 0020-0022 and claims 23-24).

4. In addition, it should be noted that Applicant has amended the preamble language of independent claim 1 to read, "A process for producing a silica-based dielectric film *in* a semiconductor device". Applicant was reluctant to change this language to read "*on* a semiconductor device". As a result, the preamble language is inconsistent with the body of the claim; however, the patentability of claim 1 lies in the body of the claim, which reads, "*applying*

Art Unit: 1712

directly on a semiconductor device a film comprising at least one siloxane compound...".

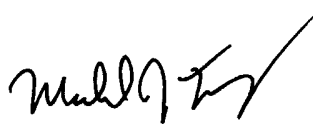

Accordingly, claims 1-3, 5-11, 17, and 19 are patentably distinct over the prior art for the reasons set forth in § 15 of the previous Office action.
